Marcus Reed

Software Engineer

marcus.reed@example.com

Profile

Software engineer contributing to internal workflow products. Experience developing Python endpoints and relational data features within a small product team.

Technical skills

Python, FastAPI, PostgreSQL, pytest, Git, Docker

Experience

Software Engineer

Brambleworks | 2023 - Present

- Built Python FastAPI endpoints for an internal inventory prototype.
- Designed PostgreSQL tables and wrote queries for stock adjustments and warehouse locations.
- The project summary describes a production pilot. The final handover identifies staging as the only verified deployment environment.
- Release ownership was shared with another team and is not specified in the project handover.
- Ran manual endpoint checks and documented expected responses before review.

Application Developer

Elmford Studio | 2021 - 2023

- Maintained Python scripts for importing customer-provided spreadsheets.
- Worked with product colleagues to reproduce bugs and document acceptance checks.

Selected project

Inventory adjustment workflow

Added validation to a FastAPI endpoint and a PostgreSQL transaction for stock adjustments. Prepared example requests and a handover note for the platform team.
