Sofia Khan

Product Engineer

sofia.khan@example.com

Profile

Product engineer building customer-facing workflows across frontend and backend systems. Focused on TypeScript services, transactional data, and incremental releases.

Technical skills

TypeScript, Node.js, Express, React, PostgreSQL, Prisma, Vitest, Playwright

Experience

Product Engineer

Otterpath Commerce | 2022 - Present

- Owned implementation of a Node.js Express API for merchant onboarding and deployed it to production.
- Designed PostgreSQL schemas, wrote Prisma migrations, and improved queries for onboarding reports.
- Built React forms for account setup and wrote automated API tests using Vitest.
- Added Playwright tests for the onboarding journey and investigated failed production requests.

Frontend Engineer

Fieldglass Digital | 2020 - 2022

- Built React and TypeScript interfaces for account and order management.
- Worked with backend engineers to agree API contracts and handle validation errors.

Selected project

Merchant onboarding API

Implemented an Express service with PostgreSQL persistence and request validation. Added idempotent creation requests and Vitest coverage for repeated submissions.
