Elena Torres

Data Engineer

elena.torres@example.com

Profile

Data engineer focused on reliable analytical pipelines and well-tested reporting datasets. Works closely with finance and operations teams to improve data quality.

Technical skills

Python, pandas, Apache Airflow, BigQuery, SQL, pytest, dbt

Experience

Data Engineer

Willowbank Analytics | 2022 - Present

- Built Python ETL pipelines with pandas and Apache Airflow to prepare daily reporting datasets.
- Wrote SQL transformations and maintained analytical models in BigQuery.
- Wrote pytest tests for transformation functions, source-file validation, and duplicate records.
- Added pipeline alerts and documented recovery steps for delayed or missing source data.

Analytics Engineer

Northquay Retail | 2020 - 2022

- Created dbt models and reporting tables for inventory and margin analysis.
- Worked with analysts to agree data definitions and validate reporting changes.

Selected project

Supplier data quality checks

Built a Python validation package for supplier CSV feeds. Used pytest fixtures to cover missing columns, invalid dates, and duplicate identifiers before loading data into BigQuery.
